

Harsh Chaudhary

AI Engineer | Software Developer

Gr. Noida, India • +918791588929 • harshsingh310702@gmail.com • LinkedIn • GitHub

PROFILE SUMMARY

AI Engineer & Software Developer with practical experience building and improving **AI-driven and software applications**, with a strong interest in **Generative AI, intelligent automation, and real-world AI solutions**. Experienced in turning ideas into working projects, solving technical problems, and improving existing applications through hands-on development. Completed **AI/ML and Software Development internships at IBM and Capital Boon**, contributing to AI/ML projects and CRM development while developing a strong foundation in **software engineering, problem-solving, and building reliable user-focused solutions**.

TECHNICAL SKILLS

LLMs & Foundation Models: GPT-5.5, GPT, Claude, Gemini, Llama, Mistral, Transformers, Generative AI

Agent & Orchestration: LangChain, LangGraph, CrewAI, Pydantic AI, MCP, AI Agents, Tool Calling, Function Calling, AI Automation

RAG & Retrieval: RAG, Pinecone, Weaviate, Chroma, pgvector, FAISS, Embeddings, Vector Search, Cohere Reranker, Hybrid Search, Reranking

Languages & Scripting: Python, Java, TypeScript, JavaScript, Rust, SQL, C/C++, Bash

AI/ML & Data: Machine Learning, Deep Learning, NLP, TensorFlow, PyTorch, Pandas, NumPy, Anomaly Detection, Feature Engineering,

Backend & Software: Spring Boot, Spring AI, FastAPI, REST APIs, API Integration, PostgreSQL, Supabase, React, Next.js, Tailwind CSS

Observability, Evaluation & Safety: LangSmith, Langfuse, Arize, LLM-as-Judge, PII Redaction, Prompt Injection Defense, Jailbreak Resistance

Cloud, DevOps & Tools: AWS Bedrock, Azure OpenAI, Prompt Caching, Model Routing, Docker, Git, Linux, CI/CD, Postman, Antigravity

EDUCATION

University of Petroleum and Energy

M.C.A (AI/ML)

Dehradun, India • Jul 2024 - Present

WORK EXPERIENCE

Capital Boon | Software Developer Intern | 3 Months

- Feb 2026 – Apr 2026

- Developed and enhanced a **CRM application** using **JavaScript and Rust**, implementing new features and improving existing functionality to streamline **CRM workflows, customer-data management, and user experience**.
- Maintained and optimized **CRM modules and workflows**, troubleshooting application issues and applying **debugging, testing, feature development, and performance improvements** to enhance application reliability.
- Contributed to **software development, API integration, backend development, and application enhancement**, improving CRM functionality and enabling more efficient management of customer information and business workflows.

IBM | AI/ML Intern

- Nov 2025 – Jan 2026

- Developed **AI/ML projects** by applying **machine learning, NLP, and data-processing techniques** to practical problem-solving and intelligent application development.
- Built and evaluated AI/ML solutions using **Python, machine learning, NLP, data processing, and model-development workflows** to generate useful insights and improve information processing.
- Applied **AI/ML techniques** to intelligent applications, gaining practical experience in **machine learning, AI engineering, model evaluation, and software development**.

Indian EXPO Mart | IT Manager |

- Sep 2022 – Jan 2023

- Led a **50+ member team** supporting **IT infrastructure, network connectivity, hardware, and digital operations** across large-scale events and exhibitions.
- Coordinated with **internal teams and external vendors** to deploy and maintain IT infrastructure, ensuring reliable connectivity and smooth technical operations during event setup and execution.
- Managed **real-time troubleshooting and incident resolution** for network and hardware issues during live events, minimizing operational disruptions and maintaining reliable digital services.

CURRENT PROJECT

AI-Powered RAG Knowledge Assistant

Building a RAG-based AI application that retrieves relevant document context and generates grounded LLM responses, helping users find and summarize information faster.

CERTIFICATIONS

IBM SkillsBuild — Artificial Intelligence

Oracle — Java Foundations
